I am a member of a Statistics class at Cañada College and we are conducting a brief survey to collect data that we can analyze as a class. Your information will remain completely anonymous and be used only for the purpose of demonstrating principles of Statistics. **Please circle a single response for each question or fill in the blank where appropriate.**

1.   What is your gender?   **Male**   **Female**

2.   What is your age bracket?   **↓24**   **24-49**   **50-67**   **67-89**   **↑90**

3.   Which best describes your education level?

      1st Year College or **High School** or **Less**   **1-5 years college**   **6+ years college**

4.   What most accurately describes your political affiliation/beliefs?

      Democrat   **Republican**   **Other**

5.   Do you have a tattoo?   **No**   **Yes**

6.   Do you think you will ever get a tattoo, if you don't already have one? (Leave blank if you already have one)

                              No   **Yes**

7.   When you see a tattoo on someone in a public setting which best describes your feelings toward the tattoo: (Please circle only one)

Remove It   **Cover It Up**   **Depends**   **Indifferent**   **Nice**
                                                        Upon Tattoo/Placement

8.   When you see a tattoo on someone in a professional setting which best describes your feelings toward the tattoo: (Please circle only one)

Remove It   **Cover It Up**   **Depends**   **Indifferent**   **Nice**
                                                        Upon Profession/Tattoo

9.   If you are generally in the range of Depends to Nice, name any type of tattoo that would make you say Remove It or Cover It in a public setting?

10.   If you are generally in the range of Depends to Nice, name any type of tattoo that would make you say Remove It or Cover It in a professional setting?

Thank You. ☺
